# NEC Compass

The single source of location data for  
your Service

\Orchestrating a brighter world

## A SINGLE REPOSITORY FOR LOCATION DATA

NEC Compass gazetteer provides a central repository for all your location based data, recording the history of locations over time and allowing users to edit/annotate locations as their needs dictate.

Typically a “trusted” location data source is uploaded into NEC Compass; in the UK this is supplied by Ordnance Survey.

All location-based data whether that be a postal address or a cave in the Yorkshire moors can be stored in NEC Compass!

Locations in NEC Compass are fully editable, giving you total control of your location assets, as well as augmenting them with any additional, local knowledge.

Centrally store, manage and update all your location data and share across your Service’s systems to ensure a consistent and trusted view of geospatial information.

## AN EMERGENCY SERVICES PEDIGREE

- » In service since 1999
- » In use with several UK Fire and Rescue Services
- » Trusted by over 25 UK Police forces including MPS and GMP
- » In use in national policing solutions

# THE BENEFITS OF NEC COMPASS AS A SINGLE, CENTRAL DATA SOURCE

Augment, edit or store information for individual locations

Integrates with all your business and operational systems to ensure a consistent view of location data

Integrates trusted data sources such as AddressBase and the Emergency Services gazetteer

Single point of administration and maintenance to ensure integrity and validity of data with a managed service option

Augmented by legacy data and local knowledge

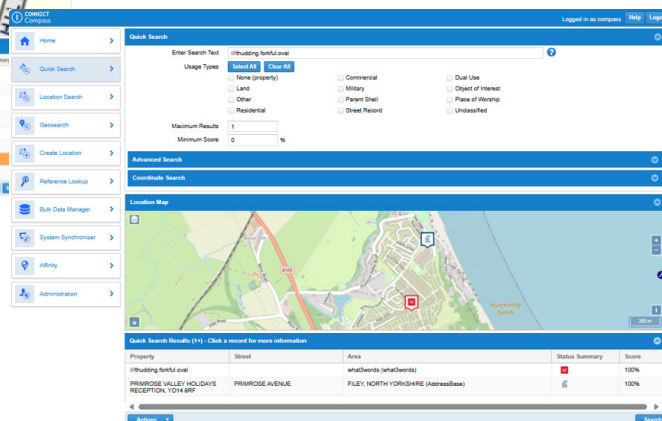

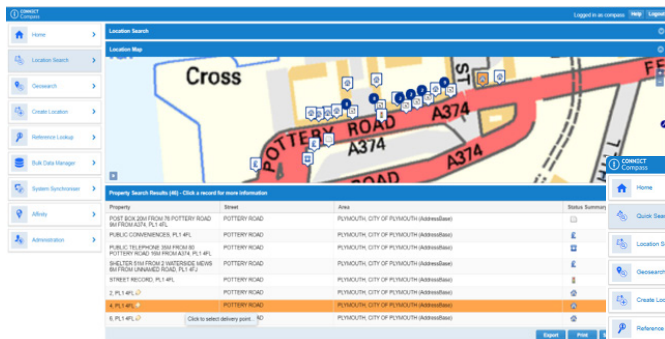

Reduced cost and effort burden on customer IT

Easily imports other data sets such as OS Points of Interest

On premise, NEC hosted or Azure Cloud environments
