

## Statement regarding the recent PHP security vulnerability

NEC Software Solutions is aware of the recently disclosed PHP security vulnerability and has been actively assessing its potential impact across our services.

The majority of our systems do not use the affected technology.

For those systems that do, we have completed patching or are in the process of applying updates as a priority.

Any systems awaiting patching have been taken offline or otherwise protected until remediation is complete.

At this time, we have identified no evidence that NEC Software Solutions systems or customer data have been affected by this vulnerability.

We continue to monitor the situation closely and will take any further action required to maintain the security and availability of our services.
